BACK END: Node, Express, MongoDB, Mongoose, EJS, Ruby on Rails, PostgreSQL

OTHER: Git, GitHub, Terminal/Bash, Microsoft Office, Mac and PC

INTERPERSONAL: Communication, Leadership

SUMMARY

A hands-on web developer that thrives off of diving in head-first to tackle problems and find out the 'how and why' that make everything work. I am adaptable, a proven leader, data-driven, and prepared for any challenge to come my way. I always commit myself to the task at hand and overcome it creatively.

EMPLOYMENT

SELF-EMPLOYED

Freelance Web Developer

Remote

Dec. 18 - Current

Obtained clients and built custom sites from the ground up using technology to fit the need of the site's functionality. Created and met deadlines with the client and stayed in contact throughout the development process to ensure the clients were happy and involved every step of the project.

GENERAL ASSEMBLY WEB DEVELOPMENT IMMERSIVE

Web Development Fellow

Remote

Sept. 18 - Nov. 18

Participated in a full-time immersive Web Development course, completing in-class projects, hackathons, and personal projects focused on real-world applications of web development principles and best practices. Developed a portfolio of individually and collaboratively focused in-class projects.

THE MASTERCRAFT GROUP

Repair and Maintenance Manager

Loganville, GA

June 16 - May 18

Managed a team to maintain over 200 concurrent work orders received from 5 high-profile clients across the country to provide timely and proper service. Personally, oversaw all estimates and invoices sent to the client. Assisted in breaking the record for over \$2.5 million in sales in 2017.

PROJECTS

MISTAKE HOUSE

Feb. 19 - Current

WordPress site redesign for a client to update their online image. Met with client throughout the process to ensure they are kept updated and their changes are implemented correctly. - Currently in Development

ALFR3D

Feb. 19 - Current

A full-stack custom MERN app built to assist users in cryptotrading. The user can save the cryptocurrencies they want to track and customize when they would like to receive a notification on each cryptocurrency as the price changes. Built using React, Express, MongoDB and Node. Front end hosted on Netlify, back end hosted on Heroku. - Currently in Development

AMARILLO SKY

Dec. 18 - Feb. 19

React app built for a band in Northern Indiana to promote, provide access to information, and book them for a gig. Allows client to post new events to the database without my help and created a video tutorial to walk them through the easy process. Built using React, Ruby on Rails, and PostgreSQL, in addition to CSS. - <http://amarillosky.com/>

CIRCUIT CONNECTION

Oct. 18 - Oct. 18

AngularJS app designed to be a social media site for web developers to use and connect. This was a group project completed within a five day deadline during the General Assembly program. AngularJS, Express, Mongoose, Node, CSS, and OAuth were used in this project. Hosted on Heroku. - <https://circuit-connection.herokuapp.com/>

FISTS OF FURY

Sept. 18 - Sept. 18

Original game built involving the DOM using custom jQuery and JavaScript. Built for two players to enjoy on the same keyboard. Created within a one week deadline during the General Assembly program. - https://kylemeserve.com/fists_of_fire/
